

PrivateNexus Product Specification

Mission

PrivateNexus exists to become the operational face of the House of Trae ecosystem.

It is not a hypervisor. It is not a DNS platform. It is not an identity provider.

It is the safe control layer that sits above those systems.

Core Functions

Service Discovery

- Service inventory
- Service ownership
- Dependency mapping

Visibility

- Health monitoring
- Backup visibility
- Certificate visibility
- Deployment visibility

Operations

- Restart services
- Maintenance mode
- Backup execution
- Diagnostics

Governance
